SST TRAY SYSTEMS

SST-2136...The Full Size System

Sized for complete surgical sets. Ideal for retrieval of O.R., O.B. instruments and high volume E.R.'s.

Code No.	Description	Length	Width	Depth	Temp
SST-2136	Amber	21.000	13.000	6.000	285°F
SST-2136 RD	Red	21.000	13.000	6.000	250°F
SST-2136 GSK	Gasket Cover	21.000	13.000	6.000	250°F
SST-2136-SS	Stainless	21.000	13.000	6.000	285°F
SST-2136 LTCH	W/Latch	21.000	13.000	6.000	285°F
SST-2136 RD LTCH	Red w/Latch	21.000	13.000	6.000	250°F

SST-283...The Mid-Size System

This SST is sized for minor procedure sets including for retrieval of small O.R. and O.B. sets. May be the right size for E.R., Nursing Floors and Clinics. Steri-strainer is autoclavable to 285°F. Latches are optional.

Code No.	Description	Length	Width	Depth	Temp
SST-283 RD	Red	18.000	12.000	3.000	275°F
SST-283 RD LTCH	Red w/Latch	18.000	12.000	3.000	275°F

SST-105...The Small Size System

Our small unit is available with solid or slotted cover. and autoclavable to 275°F. It's ideal for use in Clinics, E.R. and Floors for a small number of instruments.

Code No.	Description	Length	Width	Depth
SST-105	Solid Top - Blue	10.000	7.000	6.000
SST-105-S	Slotted Top - Blue	10.000	7.000	6.000
SST-105 RD	Solid Top - Red	10.000	7.000	6.000
SST-105-S RD	Slotted Top - Red	10.000	7.000	6.000
SST-105 RD LTCH	Solid Top-RD w/latch	10.000	7.000	6.000
SST-105 LTCH	Solid Top-Blue w/Latch	10.000	7.000	6.000

Long Saf-T-Soak Systems

These trays are the solution for soaking and cleaning scopes, cameras and other long instruments. Made of chemically resistant plastics, each system includes a base, a cover to limit fumes and a Steri-Strainer to safely remove contents without contacting the solution. Autoclavable to 270°F

Code No.	Description	Length	Width	Depth
SST-2006	Amber Base & Cover	20.875	6.375	8.000
SST-485	Blue Base & Cover	18.000	6.750	6.000
SST-835	Blue Base & Cover	35.500	8.250	6.250

SST SYSTEMS

SST-2415 RB

Utilize your own wire sterilization basket as the “steri-strainer” inside this large container. Cover snaps firmly in place. Tray is molded of tough blue polyethylene. Max temp 185°F.

Code No.	Length	Width	Depth
SST-2415 RB	24.000	15.000	5.000

Flexible Endoscope Tray

Designed by endoscopy nurses, in this 20” diameter tray flexible scopes can be safely coiled for safe transportation of flexible endoscopes in compliance with industry guidelines. Max temp is 185°F.

Code No.	Length	Width	Depth
2220	20.000		6.000
5-2220	31.150	24.350	
2220 LOK			

SST-2315

The base tray of this system is large enough to hold a complete instrument tray. The snap down lid and molded-in gasket provide a near watertight seal. Max temp 200°F.

Code No.	Length	Width	Depth
SST-2315	25.000	14.300	6.000

SST-100

This smallest SST combines convenience with functionality. It has a small footprint but holds a several instruments. The hinged cover snaps shut to contain contents autoclavable to 275 degrees and limit harmful fumes.

Code No.	Length	Width	Depth
SST-100	9.000	4.000	3.000

SST ACCESSORIES

SST Tray Stands

With these tray stands, you can replace the outdated basin and ring stand with a system large enough to contain modern instruments - the SST-2136. Choose from a single tray or a double tray style. Manufactured of 100% stainless. Tray systems are sold separately.

Code No.	Length	Width	Height
2136-STND	15.750	28.500	33.000
2136-STND-2	22.000	34.000	36.000

Vertical Soaker

Ideal to soak M.I.S. type instruments as part of the decontamination process, the Vertical Soaker stands 20" high and 3.5" in diameter. It is graduated to 2000 ml and made of polypropylene.

Code No.	Length	Width	Depth
VS-3520	3.500	0.000	20.000

538DP-Applied

Drain contaminated fluids quickly, easily and safely with the optional Drain Plug. Can be installed in any SST Tray. Is autoclavable to 285°F.

Code No.	Description
528DP-AF-AM	Drain Plug - Installed - 1 each, Male & Female Plug System with 5 Foot Hose
538DP	Drain Plug - Installed - 1 each

Sealed Transport Carts

Covered SST containers in closed carts afford double protection during transporting. Carts are divided into two compartments (except TTCC-20 which is one compartment). Carts allow for delivery of "clean" and pick-up of "dirty" containers at the same time. Constructed of one-piece, double-walled plastic with casters of stainless steel sealed bearings. Completely cart washable. Tray systems are

PPE & Device Covers

Decontam PPE Products

Disposable Jump Suit

• Non-skid disposable surgical jump suit keeps wearer dry and comfortable. One size fits all and made of impermeable polyethylene for use with sterile gown.

Disposable Boot Legs

• Made from 2ml Polyethylene that eliminates leakage. An elastic hem holds the bootleg comfortably in place.

Face Shield

• Provides the best splash protection against exposure to bloodborne pathogens.

Electronic Heat Vest

• Reusable heat vest emits heat.
• fashioned with high collar soft shell fabric.

Decontamination Gown

• Breathable material meets AAMI PB70 Class 4 requirements for liquid barrier performance
• High level strikethrough resistance in the most vulnerable zone, protecting healthcare workers from soil and bioburden.

Gloves & Compression Socks

The Decontam Glove (DSK) is certified for use in chemotherapy. These gloves are thick enough and tough enough for use in Decontam. This thicker, 15 mil, 12" long textured, powder-free latex glove is the decontam glove of choice by professionals who handle potentially hazardous items.

Ultra Long Sleeve Glove

The Ultra Long Decontam Glove (ULN16 & ULNCS) are 16" long powder-free nitrile, latex free available in both 7 and 9ml gloves for safe handling of contaminated items in the Decontam.

Lined Sleeve Gloves are a unique fusion of an 11 mil (also available in 15 mil) nitrile glove and a 4 mil protective sleeve. It features 12 inches of sleeve length and an overall length of 28 inches, these gloves provide complete durable hand and arm protection. The sleeve gloves are comfortable, flexible, and lightweight, while the elastic cuff on the sleeve gloves inhibits slippage of the sleeve from the upper arm. These latex-free gloves are a one day use and are resistant to a broad range of hazardous chemicals. Sold in Pairs.

Custom Printed Headwear

Disposable Bouffant Caps are manufactured from latex-free polypropylene fabric and have an elastic headband for a secure and comfortable fit. Disposable Scrub Caps are manufactured from spun lace nonwoven rayon material and include a tie-back closure. Both styles are one size fits all and can be custom printed with the design of your choice including your college school colors! Reusable also available.

Code No.	Description
PRSC-WT	Custom Printed Reusable Scrub Hat
PSC-WT	Custom Printed Scrub Hats - Disposable
PBC-WT	Custom Printed Bouffant Caps - Disposable

Arm Sleeves

AORN guidelines state that arms must be covered when preparing and packaging sterile items in the clean assembly area of sterile processing, which is why we've developed the arm sleeves for healthcare professionals working within the sterilization department.

Designed as an alternative to the traditional long-sleeved scrub top or jacket, the ASP-001 are made from a fast drying and moisture wicking polyester material, the ASP-002 are 80% Acrylic and 20% Nylon. Both materials are one sized fits all and machine washable. The arm sleeves are available for purchase in a pair.

ANTI-FATIGUE MAT & HUMIPAK

Autoclavable Anti-Fatigue Mats

The Autoclavable Anti-Fatigue Mat is a perfect addition to a cleaning station floor and is sure to relieve much of the stress the body endures from standing hours on end. Not only can the mat's solid, nonporous surface be cleaned by manual and automated methods (the latter in a cart washer), but can also can be further decontaminated by steam sterilization.

Non-porous rubber compound is 100% anti-microbial and is USP 797 compliant.

- 100% anti-microbial for sterile areas
- 100% latex-free, non-porous rubber compound
- Withstands extensive sterilization, including autoclaving
- Domed design provides long-lasting comfort for long shifts

Code No.	Description	Width	Length
AFM-580	Autoclavable Anti-Fatigue Mat	2.000	3.000

Keep Soiled Instruments Moist with Humipak

Time Is the Enemy

Instrument manufacturers, AAMI, AORN and others generally recommend that decontamination of instruments begin within 30 minutes of use so that organic soils, particularly blood, do not dry. But often this is not possible. Is there a solution to extended holding time of soiled instruments?

Humipak is the Solution

The Humipak consists of a layer of highly absorbent material sandwiched between two layers of water proof film.

Facilitates Cleaning

To use, place individual instruments, or an entire instrument tray inside the Humipak, add the specified amount of water to the absorbent layer, and seal with the peel away adhesive strip. This creates a water tight, moist atmosphere that will prevent organics from drying over an extended period of time.

Contents are Visible

The transparent film allows observation of the contents and a list of contents and/instructions can be written directly onto the film.

Demonstrable Results

Testing has demonstrated that soils will remain moist for up to 3 days, depending upon the type of instruments, and the exact composition of the residue.

Give Humipak a Try Today

For more information, or to request a free sample to try, call 800-521-6224 or visit www.hmark.com today.

Keep instruments moist and ready for effective cleaning with Humipak!
